

Instructions offline update for WLZENT03

Prepare USB stick:

1. Download offline update
2. Open .zip file
3. Copy the folder it contains ("WLPRO_offline_Installer_3_0_3") to the USB stick

Install update:

1. Check the current version (WL Pro: Help menu at the top right > About...)
2. Put the system into MaintenanceMode (Start menu at the top left > Other > MaintenanceMode)
3. (The device will shut down and restart automatically; do not disconnect it from the power supply!)
4. Insert the USB stick
5. (The "Removable Disk" window will appear)
6. Select "Open in File Manager" and click [OK]
7. Drag the "WLPRO_offline_Installer_3_0_3" folder from the USB stick with the update to the WLZENT desktop (IMPORTANT: The folder must then be visible directly on the desktop. Do not use subfolders.)
8. On the desktop, click on the "WLPRO_offline_Installer_3_0_3" folder
9. (The File Manager opens)
10. Right-click on the "install.sh" file (without a mouse: tap the file with two fingers at the same time)
11. Select "Properties"
12. (The "Properties" window will appear)
13. Select the "Permissions" tab
14. Under "Execute:", select the entry "owner only" (without a mouse: open the on-screen keyboard, tap the selection with your finger, use the on-screen keyboard to select "owner only" with the arrow key, press [ENTER]).
15. Click [OK]
16. Click on "install.sh"
17. In the "Run File" window, click on [Run in Terminal]
18. (The installation will run)
19. Check that the console displays the following in green at the end: "LLXC Version 18, Protocol Version 11, WL Pro Version 3.0.3"
20. Close all windows
21. Move the "WLPRO_offline_Installer_3_0_3" folder from the desktop to the recycle bin
22. Empty the trash (right-click on the trash can (without a mouse: tap with two fingers at the same time)
23. Eject and remove the USB stick
24. Exit maintenance mode (Start menu at top left > Other > ExitMaintenanceMode)
25. (The device will shut down and restart automatically; do not disconnect it from the power supply!)
26. (The WLPro software will start automatically)
27. Check the current version (WL Pro: Help menu at top right > About...) – "3.0.3" should now be displayed here
