LIGHTLINX®

ANYWHERE, ANYTIME, UP-TO-DATE.
THE LIGHTLINX® ONLINE PORTAL BY RP-TECHNIK

LIGHTLINX® is RP-Technik's web portal that provides an overview:
Wherever your projects and installations are located: configurations, system status, test logs - LIGHTLINX® lets you keep track of everything.
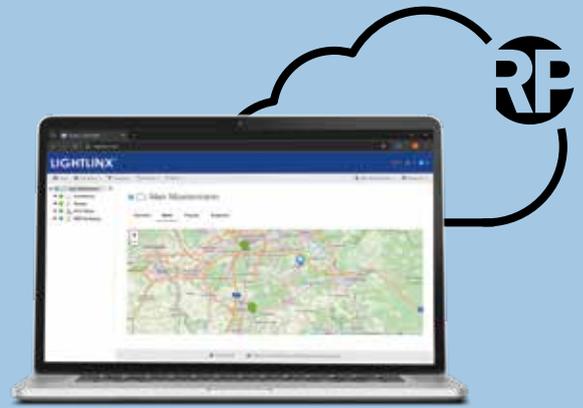

MADE IN GERMANY

SOLUTIONS IN SAFETY+LIGHTING

LIGHTLINX®

- RP-Technik's emergency lighting systems store their configuration and test logs in the LIGHTLINX® Cloud [1].

- The LIGHTLINX® portal displays all information and actively notifies users of changes.

- Installations can be filtered and sorted by system status, region, etc.

- Ideal for planning maintenance trips and documentation from the office.

FUNCTION OVERVIEW

LIGHTLINX® WEB PORTAL FUNCTIONS

- Display of installations by region and status (map, table)
- Filter and sorting function for quickly identifying an installation

Structured project view:

- Display of master data, location (map), and general information
- Display of building plans with the position of all luminaires and devices[2]
- Display of system status
- Clear display of all luminaires and devices including status, details, settings, event log, and test log
- Easy navigation and finding of relevant devices through cumulated group status display

Notifications:

- LIGHTLINX® optionally monitors connected projects automatically
- Emails are sent to responsible persons in case of an error or connection interruption
- Optional reminder function repeats sending until the cause of the error is resolved

LIGHTLINX® Cloud FUNCTIONS

- Storage of master data and configuration of RP emergency lighting installations
- Storage of device data, operating mode and group information
- Storage of events and test logs

REGISTRATION, ACCESS

- Registration and login at www.lightlinx.com
- To use LIGHTLINX®, you will need to enter a product code upon first login. This code is included with supported RP products.
- Initially, access is only granted to your own, self-created installations.
- Sharing: Users can grant each other (e.g., colleagues, business partners, and sales partners) access to their own installations.
- Handovers: Users can completely transfer full access to their own installations to others (e.g., from the installer to the operator).

SUPPORTED PRODUCTS

- RP Wireless Basic (Android or iOS)
- RP Wireless Professional from version 3.0
- RP multiControl plus, RP CoreCompact24 [3]
- More in preparation

---

(1) LIGHTLINX® support for most RP products
(2) Provided the software version on the device supports it
(3) LIGHTLINX® Data Collector required
