

**THE FUTURE
STARTS NOW!**

THE NEW GENERATION

DIGITALLY DESIGNED. MODULAR CONSTRUCTION. MAXIMUM SAFETY.

DIGITALLY DESIGNED. MODULAR CONSTRUCTION. MAXIMUM SAFETY.

THE NEW GENERATION

The new Core generation combines intelligent system architecture with intuitive operation. The result: greater comfort and safety.

OPERATION REDEFINED

Web-based. Secure. Location-independent.

The system can be operated via a LAN/WLAN connection using a laptop, tablet or smartphone. No special software. No special software or installation required. Secure thanks to end-to-end encryption.

INSTALLATION WITHOUT DETOURS

Automatic detection. Automatic configuration. Automatic integration.

New luminaires or modules are automatically detected and integrated. An integrated wizard assists with commissioning and maintenance. Central firmware updates for the entire system at the touch of a button, as well as simple backup and restoration via USB stick. Less time required. Greater efficiency in setup and maintenance.

ONE ARCHITECTURE FOR ALL PROJECT SIZES

From two-circuit systems to large-scale installations with thousands of luminaires. Modular in 19" technology. Unlimited expandability to meet project requirements. Clear graphical display included.

INTELLIGENT LUMINAIRES

Individually addressable. Switchable and dimmable. Unlimited flexibility in control.

CONTROL WITHOUT LIMITS

Scene, group and individual control – across circuits. Different autonomy times per construction phase are also supported.

MAXIMUM FAILURE SAFETY

Decentralized system intelligence. Modules and lights continue to operate independently, regardless of the failure of individual control commands from the control center. This ensures safety even in the event of partial failures.

NETWORKING WITHOUT COMPROMISE

Multiple control centers merge into one system. Monitoring existing multiControl and Wireless Professional systems. Optional LIGHTLINX® connection. Investment-proof. Backward compatible. Future-proof.

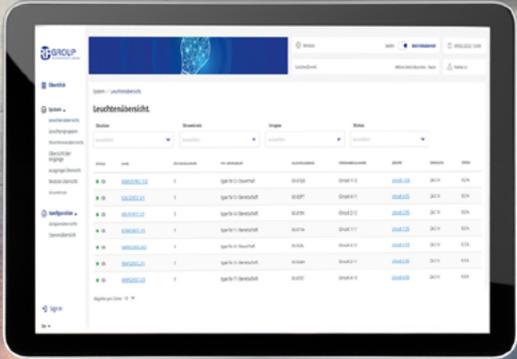

The features mentioned are already implemented in CoreCompact 24, which is available to order. Larger systems are currently still in development.

ENGINEERING EXPERTISE AS A FOUNDATION

Based on our many years of R&D expertise in central power supply systems in Germany, we create solutions that combine system intelligence and practicality.

For maximum reliability in daily use.

WHY RP-GROUP?

INNOVATIVE

Technology leader in emergency lighting.
Solutions that set standards.

HOLISTIC

Complete, ready-to-connect systems
from a single source.

EFFICIENT

Quick to plan. Easy to install.
Easy to maintain.

RELIABLE

Thoroughly tested.
Safe in an emergency.

DURABLE

Developed and manufactured
in Germany.

GUARANTEED

5-year guarantee on many
safety luminaires.

TRAINING INCLUDED

Technical training for planning,
installation and operation.
