Controller for sub-distributions
Controller for sub-distributions TSC-UV

The TSC-UV is a compact, standards-compliant rail-mounted controller for monitoring and switching in sub-distributions of emergency lighting systems. With four independent current control loops (CCIF), integrated mains monitoring, and tenant power input, the TSC-UV offers maximum operational safety and flexibility. Easy integration via RS485, LED status indicators, and a practical mode selector switch ensure convenient installation and maintenance.
