Field-Line-Monitor
Field-Line-Monitor MCFLM

The Field Line Monitor MC-FLM is a versatile module for monitoring a local AC power network and for switching luminaires or luminaire groups. Each module forms its own group, allowing for collective switching – for example, together with the general lighting.

The MC-FLM is suitable for use with central battery systems, with full functionality available when used in combination with the multiControl plus series.

Equipped with an integrated single-phase mains monitoring input, a switching input, AC/DC evaluation of the emergency lighting voltage, and a multi-colour status LED, the MC-FLM ensures reliable operation and clear status indication.

TECHNICAL DATA

Material	Polycarbonate
Input voltage AC	230 V
Input frequency	50 / 60 Hz
Temperature range	-20 °C to 50 °C
Depth	72 mm
Width	96 mm
Height	54 mm
Weight	0.116 kg
Customs tariff number	85389091
Power factor	0,77 PF
Monitoring	Included
Connection cross-section	0,5-2,5 mm ²
Switching input	Yes
min. Input voltage AC	230 V
Input frequency	50 / 60 Hz
Input voltage DC	216 V
Max. Output voltage DC	216 V

Nominal output	650 VA/500 W
Input frequency	50 / 60 Hz
input voltage AC	230 V
