Art.-Nr: LSYS-B12
Precision beam lens for accent lighting of safety devices Flexible optics for standard-compliant lighting of firefighting and first aid equipment (5 lx)

The beam lens is used for additional lighting of fire-fighting equipment, signalling units and first aid equipment fitted on the wall as well as escape and emergency plans. It has a light intensity of 5lx as required by the relevant standards.

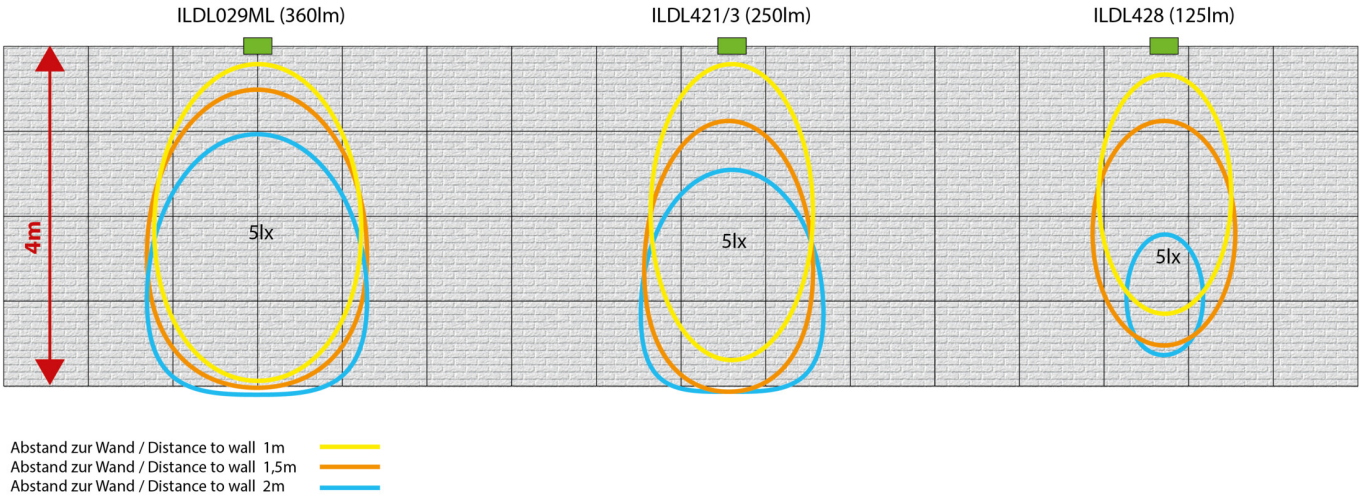

For optimum light distribution, it can be inserted into the respective luminaire directly at the mounting location using the quick-mounting system, depending on the application. This simplifies mounting and improves flexibility when installing.
