Wire suspension

Wire suspension, 4m

4m Y-wire suspension as a set with surface-mounted adapter for ceiling mounting, suited to cube luminaires.

By simply inserting, the wire is secured to two points on the surface-mounted adapter with cross stays. The wire with a diameter of just 1.5 mm ensures an elegant and high-quality suspension. The load capacity is 15kg with a safety factor of 5:1 per wire. Simple handling means that the height can be adjusted with just one hand. Two adjustable attachment points with optimised leg length simplify alignment and ensure the perfect balance.
