Art.-Nr: LSYS-H4

H-lens Special optics for emergency lighting in escape and rescue routes (installation height from 4 m) Optimised light distribution in two main directions – specially designed for high mounting points and maximum flexibility.

The H lens is optimised for mounting at 4 metres and higher. It directs the light in two main directions illuminating emergency routes and corridors.

For optimum light distribution, it can be inserted into the respective luminaire directly at the mounting location using the quick-mounting system, depending on the application. This simplifies mounting and improves flexibility when installing.
