Art.-Nr: LSYS-WD4
Wall-down lens for precise corridor lighting and safety lights Optimal downward light control thanks to 90° beam angle in quick-assembly system

The wall-down lens directs the light to the center of the corridor. The lens fits for wall-mounted safety luminaires, with the LED beaming in a right angle to the wall.

For optimum light distribution, it can be inserted into the respective luminaire directly at the mounting location using the quick-mounting system, depending on the application. This simplifies mounting and improves flexibility when installing.
