## Art.-Nr: WLKOR4

# Wireless Professional Software with USB Coordinator Central Windows software for automatic management, testing, and monitoring of up to 1,000 Wireless Professional luminaires per control unit.

Wireless Professional Software for Windows PC including USB Coordinator

The wireless system can manage up to 1,000 luminaires per control unit. It is fully self-organizing. A Wireless Professional luminaire automatically establishes contact with all reachable nodes. These can be other luminaires, repeaters, or the control unit itself.

The central control software, available in multiple languages, allows for the saving of building plans and can be installed on an existing Windows system.

Wireless Professional Software meets the requirements for an automated testing system according to EN 62034.

CE
