### Company Profile RP-Group

The RP-Group employs over 200 people at two production sites in Germany as well as at further sales locations in Germany and abroad. About half of its production is exported. The medium-sized family business is jointly managed by its owners Reinald and Roland Pasedag and the managing director Andreas Hainz. It is the nationwide leading company regarding the use of emergency and safety luminaires with innovative LED technology.

Since more than three decades, the development and manufacturing of emergency lighting systems and power supply systems is carried out by RP-Technik GmbH; general LED lighting is made by ROPAG GmbH. Batteries produced according to own specifications complete the comprehensive product range. By means of a global sales network, the RP-Group provides its lighting solutions to partner companies, OEMs and electrical wholesalers.

The high-quality products are manufactured exclusively in Germany and made of recyclable materials. They ensure an efficient operation and safety in case of an emergency. New technologies are developed and tested in own departments and in the state-of-the-art and TÜV-certified light laboratory.

Functional aesthetics are provided by the internal product design department and already received several renowned awards. The company is also the innovation leader in the field of wireless solutions for safety and emergency lighting. RP-Technik GmbH is ISO 9001:2015, ISO 14001:2015, OHSAS 18001:2007 and ISO 50001:2011 certified. Numerous products are "Type Approved" by TÜV Rheinland.
