CENTRAL BATTERY SYSTEM

The MDC system is a preconfigured central battery system without power limitation. Depending on the cabinet used, up to 72 circuits with 10A each and a recharging unit of up to 17.5 A, and one each maintained and non-maintained switch, can be installed per system.

Single luminaire or circuit monitoring is not possible with this system. The ability to switch the circuits is possible only in conjunction with the respective switching or limited. Of course, the MDC can be monitored and networked via the web interface as well.
