

Art.-Nr: OM1PA

Square, aluminium suspension rod. The standard 125mm pendant can be swapped for this when using OLED luminaires or the A series, for example. The suspension rod can be individually shortened and can therefore be perfectly sized to the structural requirements. A cable (ready to plug in) for connecting the electronics and LED is supplied.

On request, the suspension rod can be supplied in lengths of up to 1300mm.
