

Art.-Nr: TSM32
circuit module
circuit module TSM32

The TSM32 DIN rail circuit module is the ideal extension for multiControl plus emergency lighting systems. It supplies and monitors two independent circuits, each supporting up to 20 emergency or exit luminaires, and supports multiple operation modes including standby, maintained, and switched maintained lighting – all without the need for additional data cabling.

With individual luminaire monitoring, self-calibrating current supervision, and status LEDs for all operating conditions, the TSM32 ensures maximum safety and transparency. Integration is simple via the RS485 BUS, and installation is space-saving with DIN rail mounting – fully compliant with EN50171 and EN50172 standards.

TECHNICAL DATA

Material	Polycarbonate
Housing color	Anthracite
Input voltageAC	230 V
Input frequency	50 / 60 Hz
Power consumption	0,4 W
Depth	60 mm
Width	105 mm
Height	86 mm
Weight	0.26 kg
Customs tariff number	85389091

As of: 17.06.2025 - Subject to technical changes and errors.
